WORK EXPERIENCE

[Fhynix](#) | Mumbai, India

Mar 2025 - Present

Head of Engineering

- Built the app's **AI assistant** from a 2-day MVP to a flagship feature, keeping date logic in-house to run a low-cost model under **₹1,000/month**.
- Designed an **rrule-based recurrence engine**, replacing per-instance storage of hundreds of rows per recurring task with a live, backwards-compatible migration.
- Architected a **unified task data layer** (windowed store, cache, API) with a single read/write path, cutting production issues **from weekly to monthly**.
- Engineered a **zero-cost notification system** using daily silent push to sync local notifications.
- Implemented precise **WhatsApp reminders** and daily summaries on a Bull queue.
- Built a **self-managed subscription system** on App Store/Play IAP — reconciliation polling and webhooks, no billing SDK.

Dec 2023 – Mar 2025

Lead Engineer (Contract)

- Shipped the app's **entire Android platform** solo in ~3 weeks of core work, against a vendor's 3-month quote.
- Cleared a major **feature and bug backlog**, bringing an inherited codebase to its first production-ready state.

[CAW Studios](#) | Hyderabad, India

SDE 2

Apr 2021 - Nov 2023

- Designed and co-developed a **Meta-driven no-code UI form+list engine** (React + TypeScript), cutting UI development time by **30%**.
- Built an **NX monorepo** with MVC architecture, atomic design, and dependency injection for **hot-swappable, modular components**.
- Developed a **shared service library** for Web and Mobile with utility functions, an **auto-generated API SDK**, and a unified Redux store.

[Anukai Solutions](#) | Chandigarh, India

SDE 1

Aug 2019 - Mar 2021

- Built **real-time inventory updates** over **Sockets** for a helmet rental service, and **accident blackspot identification** with Punjab Police over **Google Maps**.
- **Digitised end-to-end case filing** with **RBAC**, approval workflows, and automated PDF generation.

TECHNICAL SKILLS

- **Languages & Frontend:** JavaScript, TypeScript, ReactJS, NextJS, React Native, Redux
- **Backend:** NodeJS, REST, Sockets, Webhooks, BullMQ, MongoDB, SQL, JWT, RBAC

AWARDS AND ACHIEVEMENTS

- Received certificate of Appreciation from the **Patiala Foundation** for the Helmet Bank project (August 2020)
- **Winner** at the National Level Hackathon, **OWASP** held at Thapar University
